## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 10, drawn to network address setting, classified in class 370, subclass 475.
  - II. Claim 11, drawn to network address setting, classified in class 370, subclass 475.
  - III. Claims 12 – 20, drawn to passwords used with operation commands, classified in class 713, subclass 183.
  - IV. Claim 21, drawn to passwords used with operation commands, classified in class 713, subclass 183.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Groups I and II and Groups III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions discloses:

Groups I and II discloses the use of setting apparatus for network address setting.

Groups III and IV disclose operation commands and passwords entered to allow the measurement instruments to perform measurements.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
